

CLASS IN GLASS

Hello !

Design is an art, an expression that comes from within the artist. The idea of my design perception lies in the satisfaction of clients. With my deep knowledge of every process and concept at both technical and aesthetic level, my urge to provide the most State-of-the-Art design solutions will pave the way into the future of the industry. My enthusiasm and excitement for well designed products has been a lifelong passion and newness being my driving force - I live in the world of my designs. In my pursuit of excellence I will always be committed to enrich your lifestyles with newer and innovative designs.

Background...

Recognized as an Initiator, innovator and creator in the field of design; my infinite caliber, courage and unconquerable will, along with a strong desire for perfection act as a Midas' touch for everything that I does, making all my endeavours fruitful. My passion for design and a keen eye for detail separate me from the rest and with these qualities I had carved a niche for myself in the ceramic and tile design industry. I believes that to excel in any field, one must keep learning, innovating and adapting. Being a true propagator of innovation, I have been the visionary behind several groundbreaking concepts like digital designs and have introduced the application of these designs in the ceramic industry. A multi talented personality, I have always been interested in doing something unique and my actions reflect my ideology.

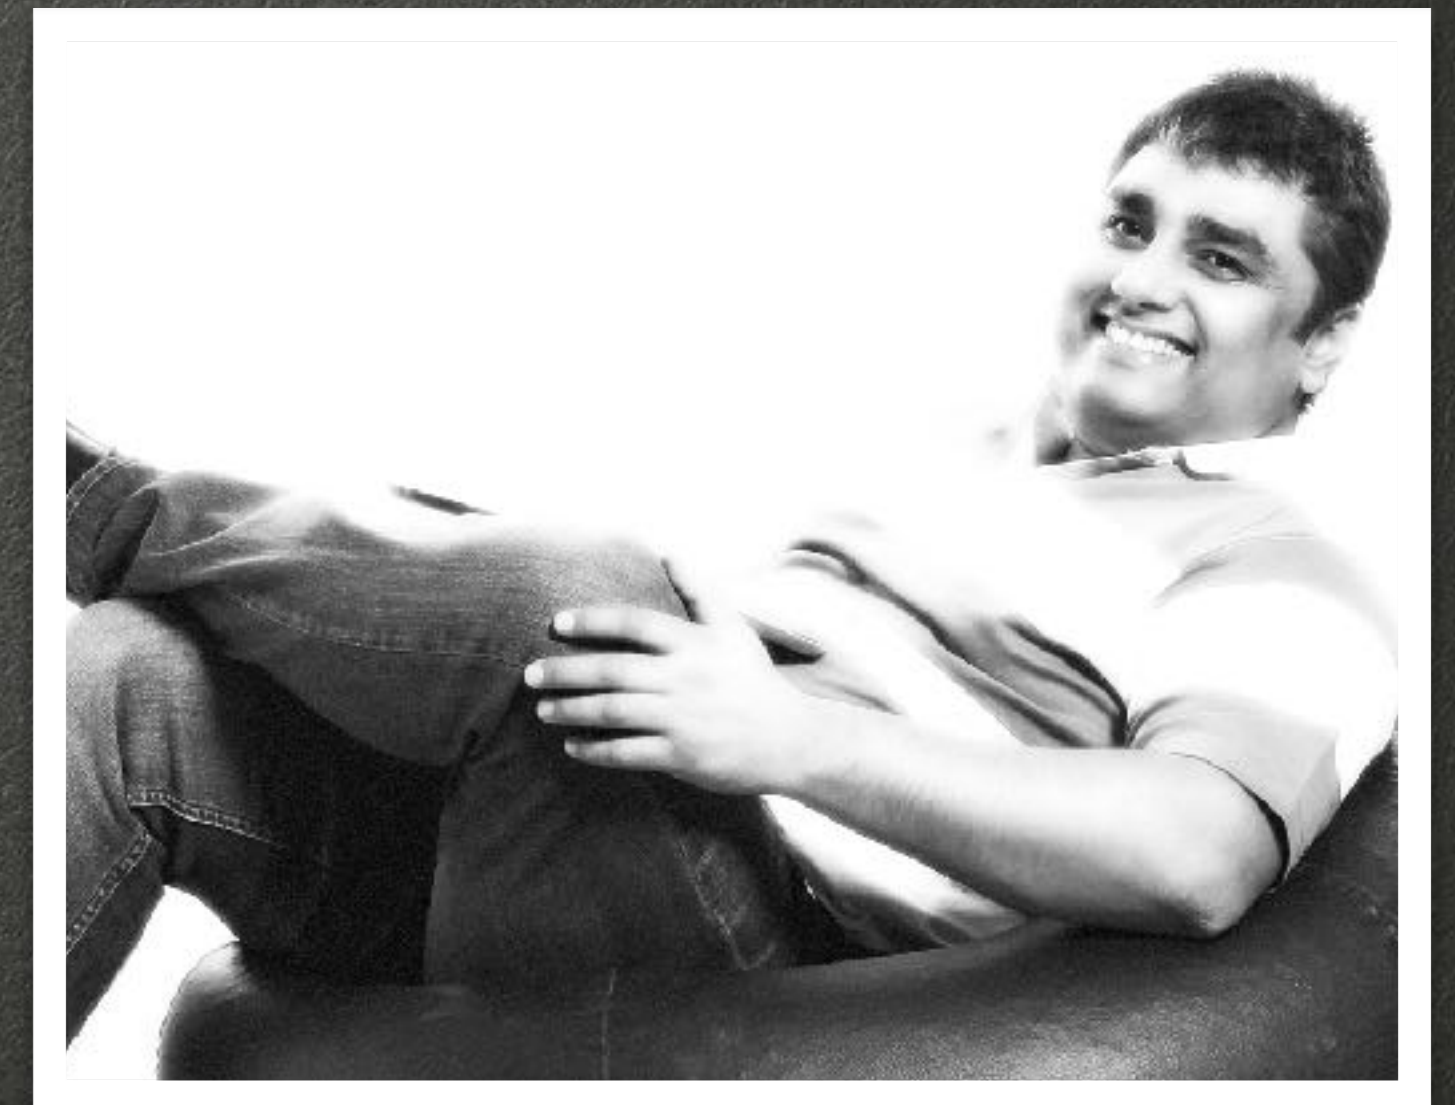

The design genius...

The term "design" signifies the birth of something new. A true artist or "Design Genius" knows beforehand the purpose of this new creation shall serve or why it needs to be created. Design professionals, by means of their designs, act as catalysts to help other parts of the organization to solve problems. A creator of good designs knows when to innovate, where to stick to the norms and how to make a design stand out.

Innovative Solutions...

Anticipating to the clients' needs and providing customised solutions. My fundamental principles of innovation, integration and excellence, combined with my in-depth understanding of the ceramic industry and industries of other clients, ensure that I am able to deliver the best quality of design services. I challenge myself and my team to out-do ourselves at each assignment, creating an environment of innovation and continual improvement within a framework of sustainable growth. Each day with an urge to provide the most aesthetic design solutions, I redefine the limits of what is technically and aesthetically possible. I am always striving to create something new, which lead the industry in terms of innovation and superior product design and technology.

I, with my enthusiasm, imagination and creativity, create the trends of today, which will formulate the future. With this far-sightedness and vision, I have the power to predict what the industry will be like in the future and also the power to change the clients' fate using only design as a tool.

Elegante

600x1200 | 300x1200 | 150x150

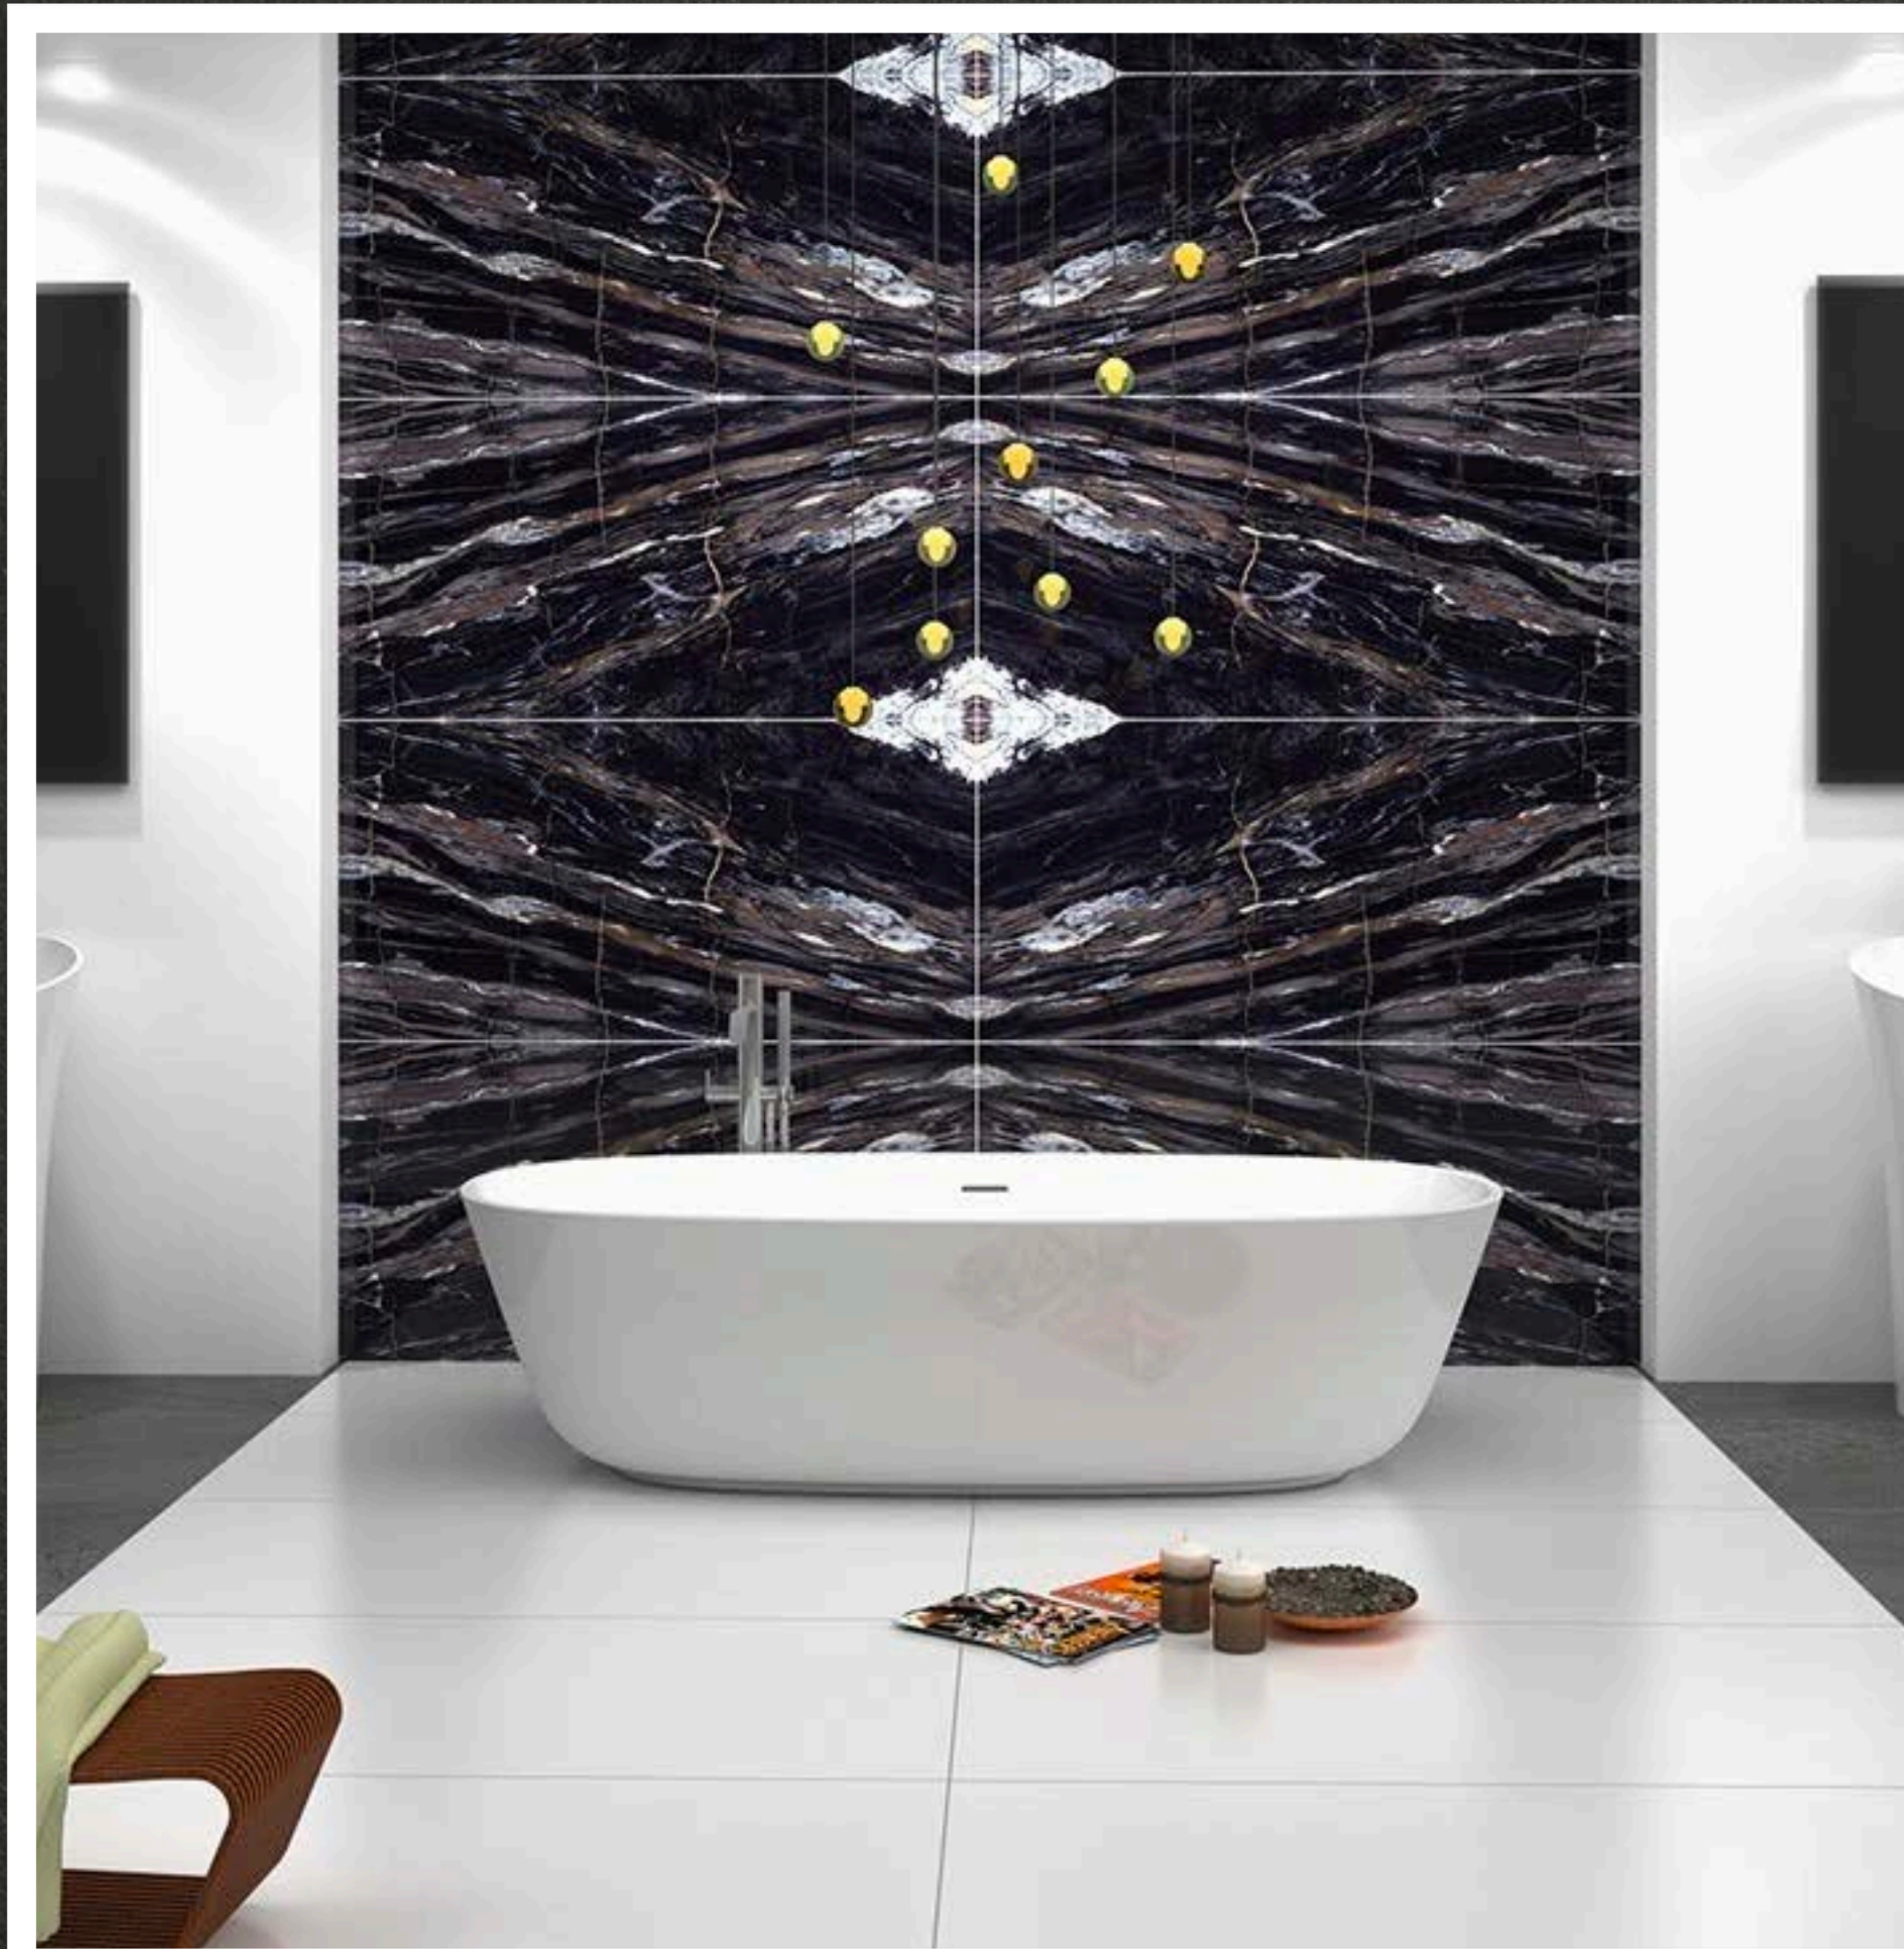

Elegante is not just a Tile it's a Fashion statement.

A unique combination of vitrified Porcelain Body fused with Glass by our unique Patent technology which make Elegante a unique and only product available in the world.

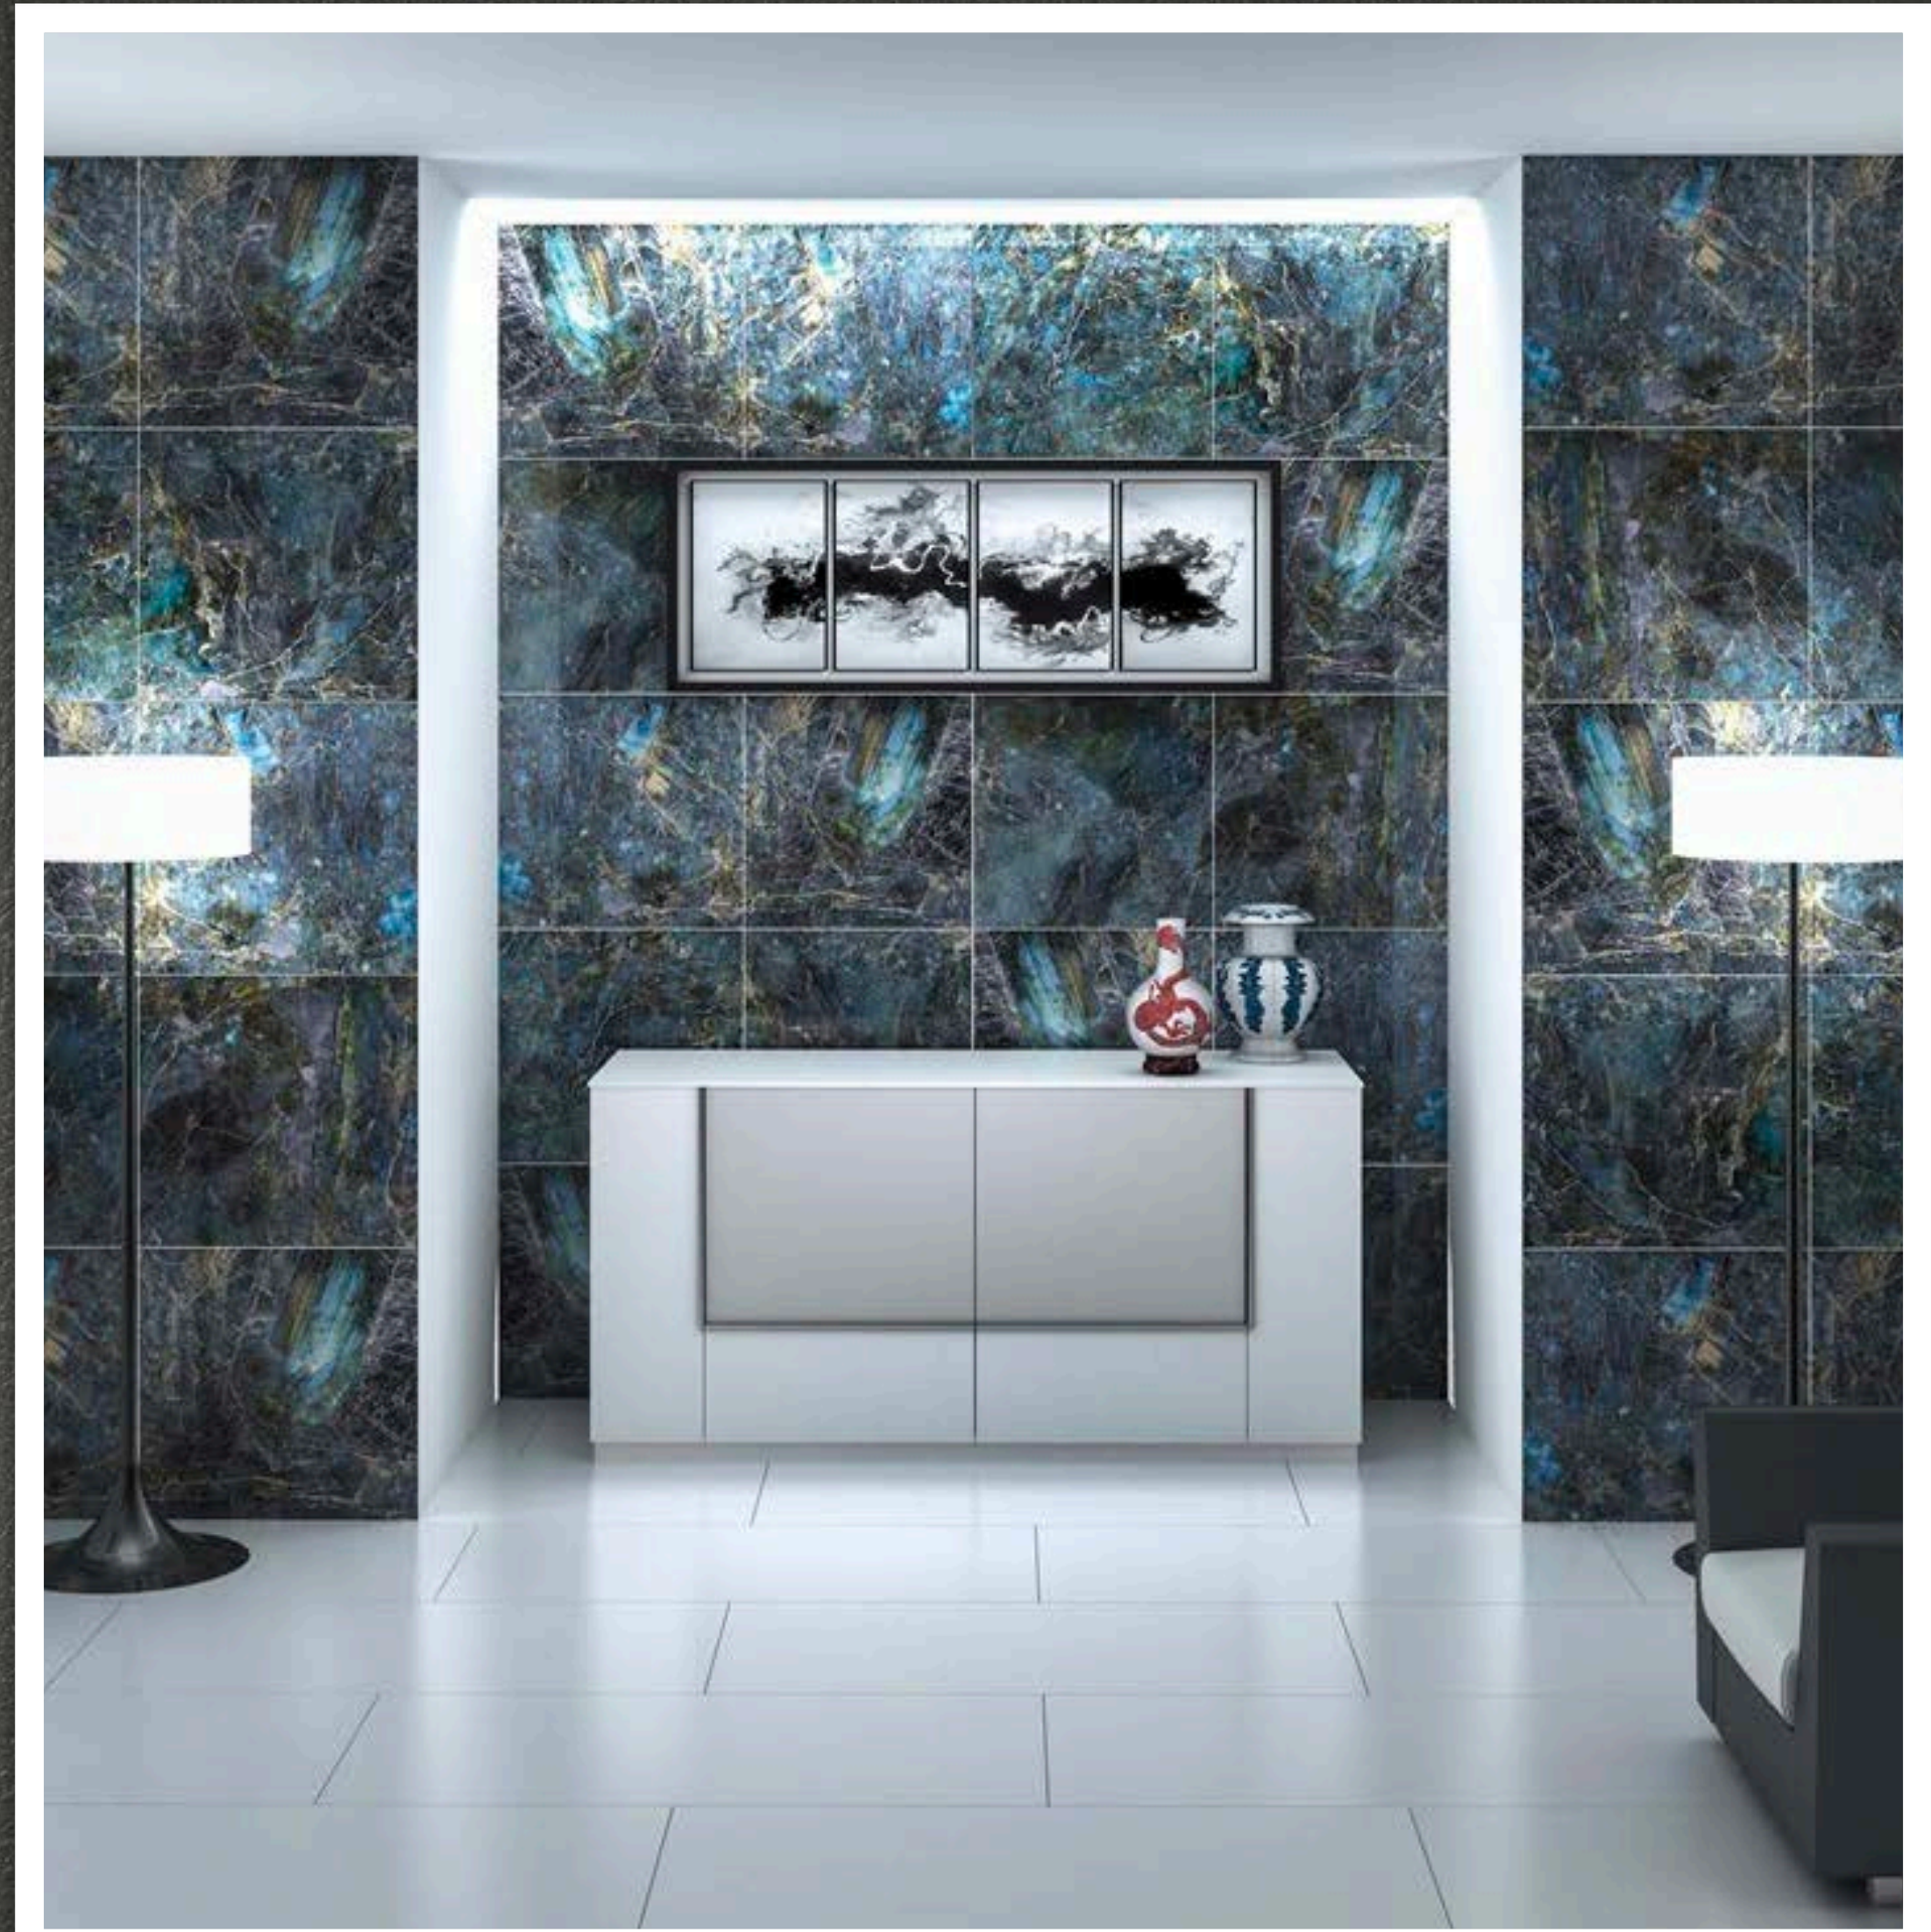

Glass being on the top of the tile makes it 100% bacteria free and the most hygienic product as well. Easy to clean and maintain.

Elegante comes with a another unique Angle Reflection Technology (ART) on the Tile with metallic printing . Due to ART it reflects light in different direction & creates aura of luxury within it.

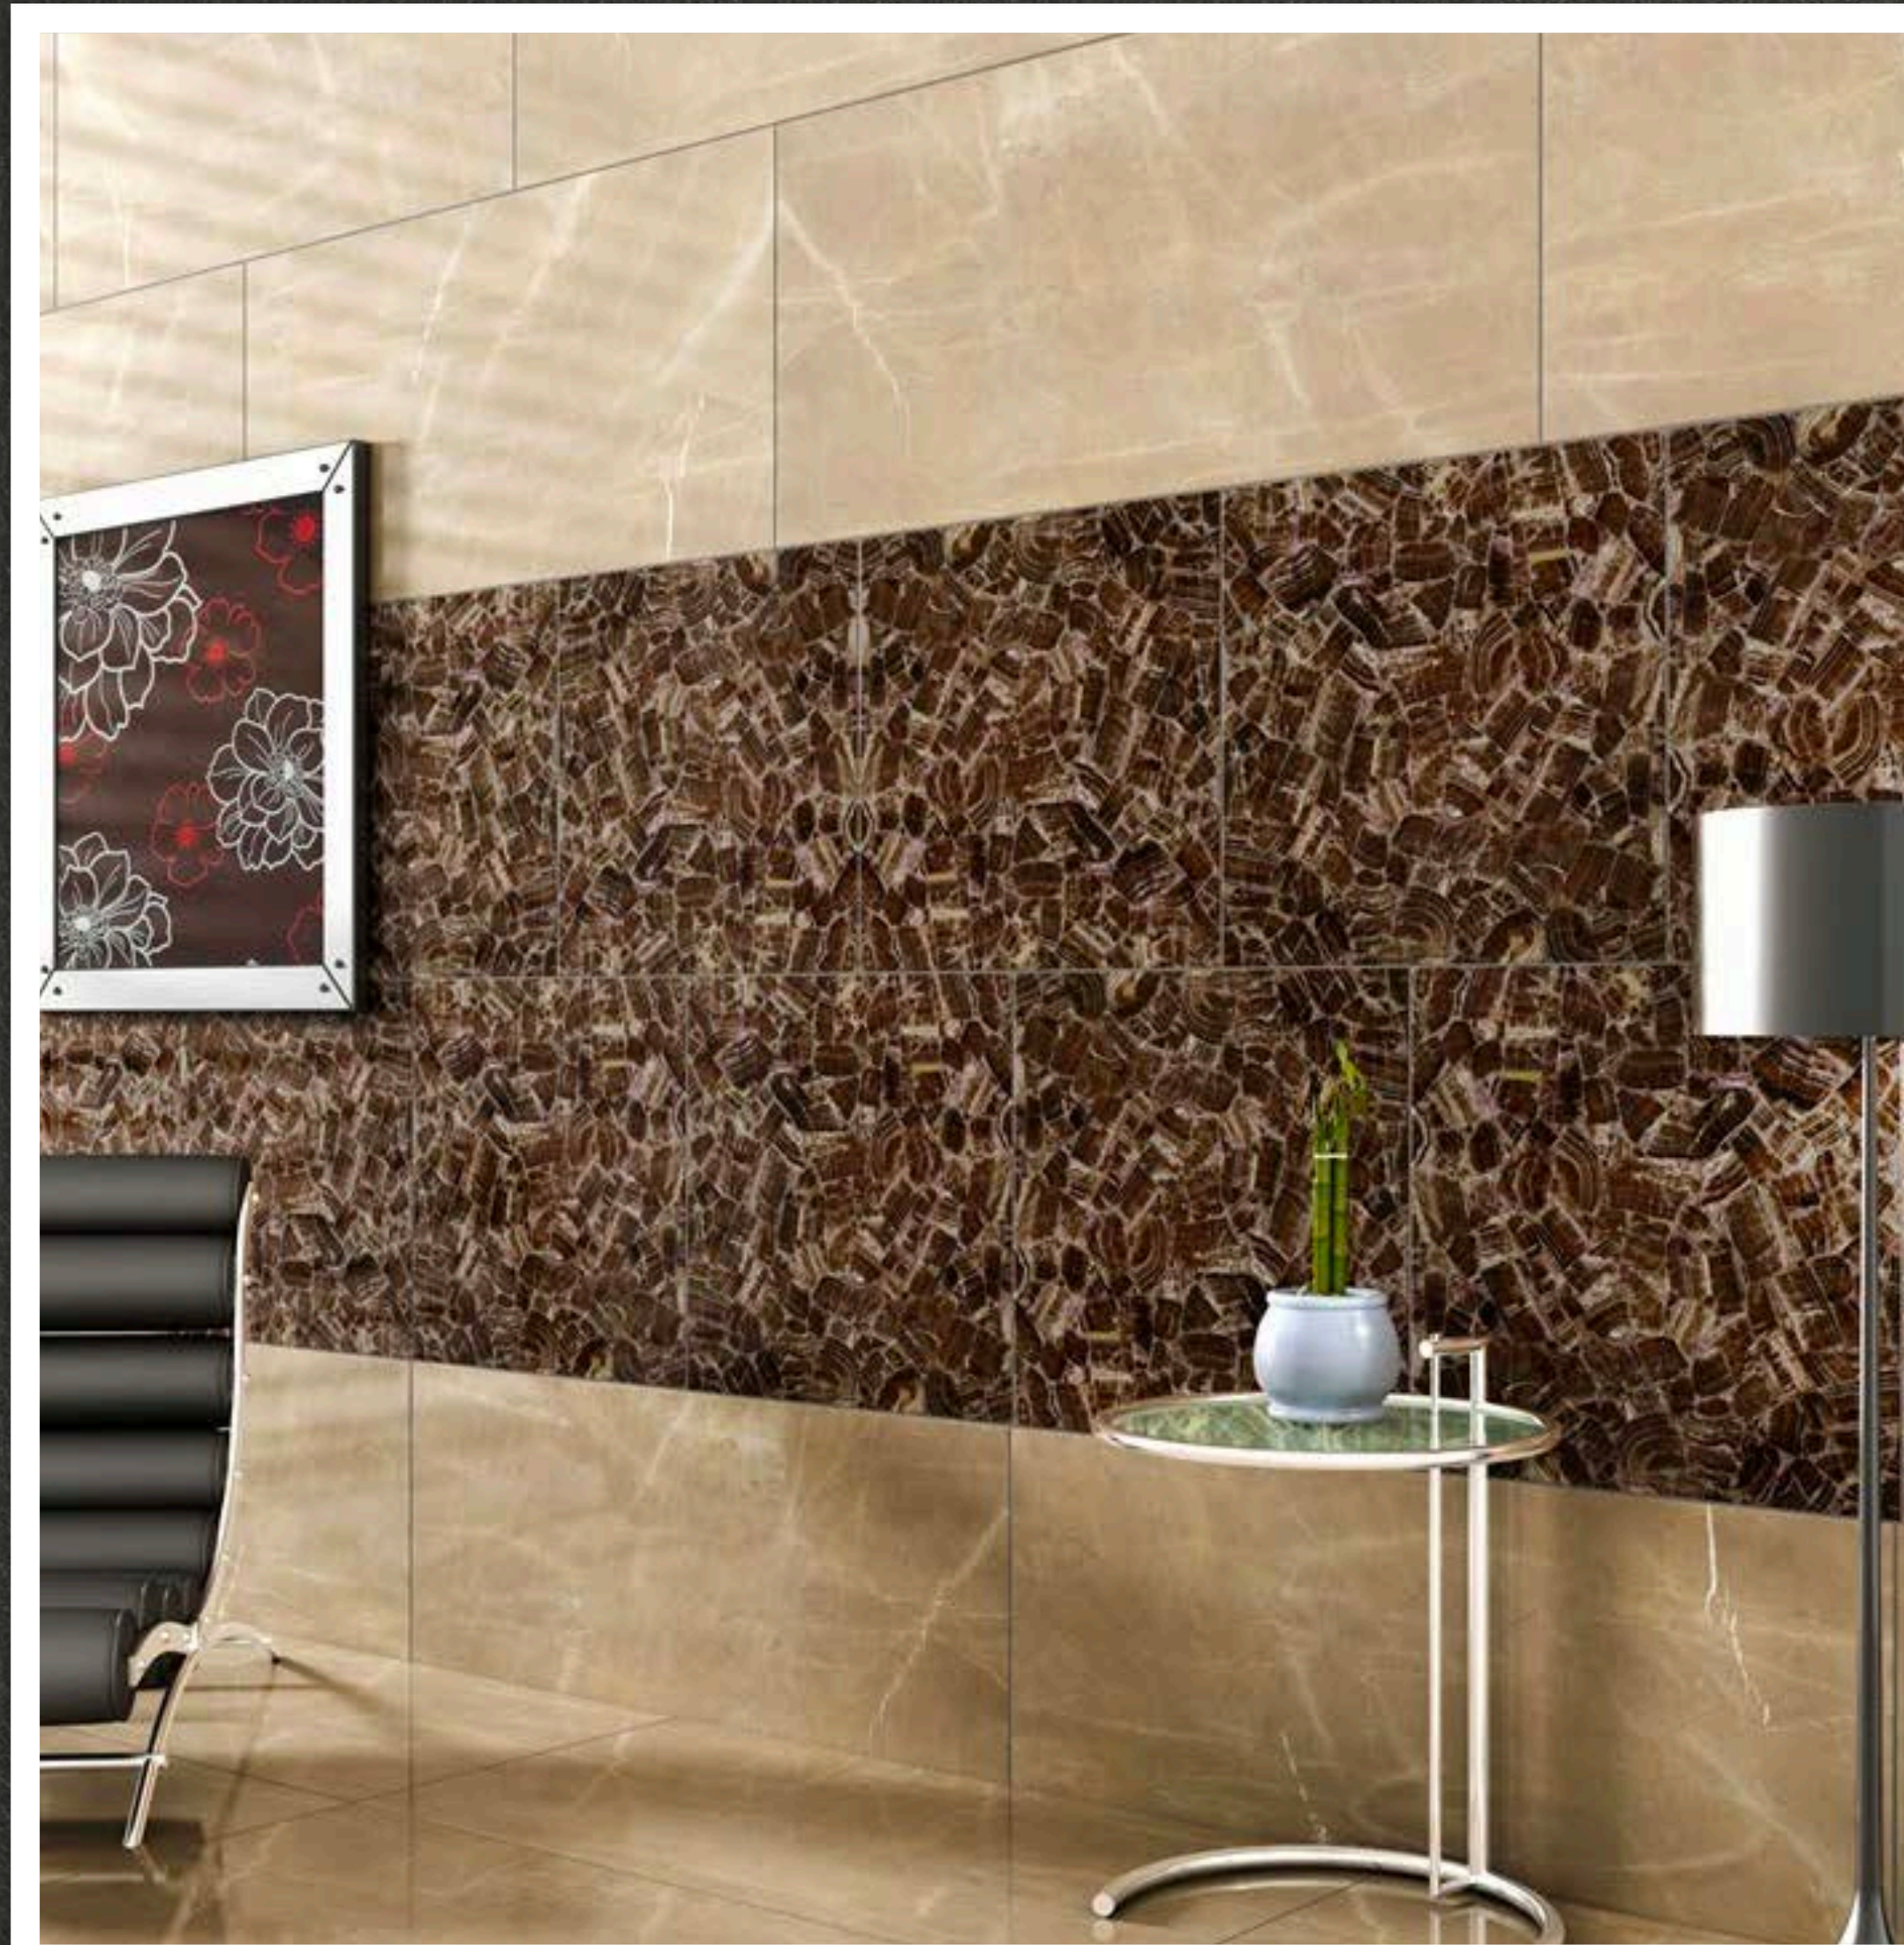

The myth of limited colours / designs in Tile industries does not apply for Elegante. Elegante can offer any / every colour / designs with its Patented Metallic ART technology.
